## Transaction-Commit Classes and Configurations

Classes are circles annotated with alphabetic labels indexed by class size. Configurations are disjoint sets of classes and are numbered from 1 to 9.

## Configurations Predicates Based on RM4

$$\begin{aligned} & \text{Config1} = & \forall R. working(R) \land \neg aborted(R) \land \neg committed(R) \land \neg pending(R) \\ & \forall R. aborted(R) \oplus working(R) \\ & \forall R. aborted(R) \oplus working(R) \\ & \forall R. \neg committed(R) \land \neg pending(R) \\ & \forall R. \neg committed(R) \land \neg working(R) \\ & \forall R. pending(R) \oplus working(R) \\ & \forall R. pending(R) \land \neg working(R) \\ & \forall R. \neg aborted(R) \land \neg committed(R) \\ & \\ & \text{Config4} = & \exists R. working(R) \land pending(R) \land aborted(R) \\ & \forall R. aborted(R) \rightarrow \neg working(R) \\ & \forall R. working(R) \rightarrow \neg pending(R) \\ & \forall R. pending(R) \rightarrow \neg aborted(R) \\ & \forall R. \neg committed(R) \\ & \\ & \text{Config5} = & \forall R. aborted(R) \land \neg committed(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config6} = & \forall R. pending(R) \land \neg pending(R) \\ & \forall R. aborted(R) \oplus pending(R) \\ & \forall R. \neg committed(R) \land \neg working(R) \\ & \\ & \text{Config8} = & \exists R. pending(R) \land \neg pending(R) \\ & \forall R. \neg committed(R) \land \neg pending(R) \\ & \forall R. \neg aborted(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\ & \\ & \text{Config9} = & \forall R. committed(R) \land \neg aborted(R) \land \neg pending(R) \land \neg working(R) \\$$
